

Meta description:

Stay safe wherever you go. Galaxy's GPS medical alert watch and mobile systems offer fall detection, CSAA Five Diamond monitoring, and 350+ hour battery — no contracts, Canada-wide.

H1: On the Go Medical Alert

H2: The freedom to live an active lifestyle, wherever it takes you.

Intro copy:

Enjoy the safety and peace-of-mind of a GPS medical alert watch — whether you're gardening, travelling, or out running errands. Help during an emergency is always a push of a button away, backed by CSAA Five Diamond certified monitoring across Canada.

Price line: Starting from \$49.95/month — with our lifetime price guarantee, that rate is locked in for good.

Trust/feature strip:

- 24/7 Monitoring — CSAA Five Diamond Certified
- Two-Way Voice
- Water Resistant (IP67) Panic Button
- GPS Location Tracking
- 350+ Hour Battery Backup
- One Click Activation

H2: Mobile Medical Alert Systems with GPS

Short framing line above the four product tiles:

Whether you prefer a discreet GPS watch or a wearable pendant, Galaxy's mobile medical alert systems keep you connected to help anywhere in Canada — no landline, no home base station required.

(Keep the four existing product tiles/prices as-is — titles already carry good keyword equity: "GPS," "Fall Detection," "Wi-Fi Calling.")

H2: Why Choose a Galaxy GPS Medical Alert Watch

Unlike home-only alert systems, Galaxy's on-the-go devices track your location using GPS and Wi-Fi positioning, so caregivers and our response centre always know where to send help — whether you're at the grocery store, travelling, or visiting family. Every mobile system includes automatic fall detection, a water-resistant panic button, and access to our multilingual support team in 200+ languages.

H2: Compare Our Mobile Systems

(keep existing comparison table — optional intro line:)

Not sure which mobile alert device fits your lifestyle? Compare GPS coverage, fall detection, and design across all four options below.

Caregiver callout block *(new section — this page is a strong fit for Cluster 3 since GPS/location tracking is caregiver-relevant):*

For Families & Caregivers

Worried about a parent who travels or spends time outside the home? Galaxy's Text to Locate feature lets caregivers check a loved one's device location by text — giving long-distance caregivers peace of mind without being intrusive.

Closing trust section:

Proudly Canadian — headquartered in Windsor, ON. No contracts. No hidden fees. Free equipment. Rated #1 by Seniors Bulletin.
